Summary

- Software developer with 1+ years consulting experience at Deloitte acting as a fusion software developer/business analyst.
- Full-stack project leader, utilizing data-informed prioritization and cross-time zone collaboration to achieve project goals.
- Proven track record of increasing user engagement and improving efficiency of existing workflows.

Technical Skills

- AI/ML Programming • Algorithm Design & Analysis • Typescript/Javascript • Python • Git
 - MongoDB • SQL Database Design • Mobile Design & Development
- Requirement Gathering • Process Mapping • GenAI Prompt Engineering

Related Professional Experience

Solutions Engineering Analyst, Deloitte, Denver, CO

June 2024–Present

- **Delivered** 80+ system enhancements and features across the development lifecycle, from conception to deployment.
- **Accelerated development cycles** by building and presenting **Proof of Concept C# and SQL solutions**.
- Planned and led weekly hybrid-Agile stakeholder meetings for requirement gathering, UAT, and functional demos.
- **Bridged** business and engineering teams, translating complex requirements into actionable technical tasks.

Software Engineering Intern, NREL (National Renewable Energy Lab), Golden, CO

Seasonal May 2022–May 2024

- Analyzed project requirements and user requests through self-led face-to-face stakeholder meetings.
- Resolved over 20 front/back-end issues through pull requests, testing, and detailed/documented collaboration.
- Restructured the data model in a highly-complex travel-data analysis pipeline server.

UI/UX Intern, Trimble, Westminster, CO

May 2023–August 2023

- Implemented a highly efficient differential/incremental database load script using Google Apps Script/Javascript.
- Analyzed requirements and user needs through self-led stakeholder meetings.
- Designed an intuitive user experience for a knowledge base document searching website.

Education

Computer Science Bachelors of Science

December 2023

University of Colorado Denver (GPA: 3.72/4.00)

- Relevant coursework include: Web API, Artificial Intelligence, Cybersecurity Programming & Analysis, Embedded Systems & Internet of Things, and Data Mining & Database System Concepts.

Related Projects

Course Dragon, Team Leader, Senior Design Project

Fall 2022-Spring 2023

- Spearheaded a 4 person team making effective use of design patterns and project management tools.
- Analyzed requirements and advisor/student needs through self-led stakeholder meetings.
- Designed and developed a web application that garnered widespread positive adoption among classmates.

Additional Work Experience

Coding/Math Tutor, TutorDoctor, Littleton, CO

March 2021–December 2021

- Created 11 customized learning plans for primary and college level students in AP Computer Science and math.
- Developed personalized homework-completing and attention-keeping habits for students.

L2 Technician, C Squared Computer Consulting, Littleton, CO

July 2019–May 2022

- Supported 100+ clients through creating automated Powershell scripts, engineering networks, and remote-troubleshooting.
- Trained 5-10 new technicians on troubleshooting and client-communication skills.
