SUMMARY

Full-stack software developer with 4+ years of experience building web applications and data pipelines. Guided by data insights and business purpose, experienced across the entire software lifecycle from UX design to DevOps. Personable and highly adaptable engineer who independently picks up new tech on the job and naturally bridges technical teams with business stakeholders.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript/TypeScript, React, Angular, Svelte, Node.js, C#/.NET, Java, SQL, HTML/CSS
Databases & DevOps: PostgreSQL, MySQL, MongoDB, Docker, CI/CD, Azure DevOps, Jira, Linux Terminal, Bash, PowerShell
Systems & UX: Network Architecture, Figma Prototyping, GenAI Prompt Engineering, Agile/Scrum, Mobile Development

PROFESSIONAL EXPERIENCE

Software Developer I / Solutions Engineering Analyst, Deloitte, Denver, CO — Jun 2024 – Present

- Owned 160+ work items from requirements through deployment in an Agile environment, translating stakeholder needs.
- Wrote C#/.NET and SQL proof-of-concept code adopted by dev team as the foundation for production features.
- Designed high-fidelity Figma prototypes using human-centered UX design officially adopted by client stakeholders.
- Wrote SQL queries to analyze data and add context to nearly every feature.
- Facilitated Agile ceremonies (backlog prioritization, UAT, functional demos) for client stakeholders.

Software Engineering Intern, NREL (National Renewable Energy Lab), Golden, CO — May 2022 – May 2024

- Resolved over 20 front/back-end issues through pull requests, testing, and detailed/documented collaboration.
- Analyzed project requirements and user requests through self-led face-to-face stakeholder meetings.
- Restructured the data model in a highly-complex travel-data analysis pipeline server.

UI/UX Intern, Trimble, Westminster, CO — May 2023 – Aug 2023

- Engineered a self-sustained differential database refresh algorithm using Google Apps Script and Javascript.
- Designed an intuitive search-bar UX for an internal knowledge base based on self-directed user research.

PROJECTS

Course Dragon, Team Leader, Senior Design Project — Aug 2022 – May 2023

- Led a 4-person team in designing and building a full-stack web app for university course planning, using React + MongoDB, REST APIs, and a Git-based workflow with Scrum sprints.
- Gathered and translated requirements from advisors and students through 4 stakeholder interviews into user stories.

EDUCATION

Computer Science Bachelors of Science — Dec 2023

University of Colorado Denver (GPA: 3.72/4.00)

- Coursework highlights include: Web API, Artificial Intelligence, Cybersecurity Programming & Analysis, Embedded Systems & Internet of Things, and Data Mining & Database System Concepts.

ADDITIONAL EXPERIENCE

L2 Technician, C Squared Computer Consulting, Littleton, CO — Jul 2019 – May 2022

- Supported 100+ clients through remote troubleshooting, network engineering, and escalated (Tier 2) issue resolution.
- Wrote Powershell automation scripts that eliminated recurring tasks.
- Trained and mentored 5-10 new technicians on troubleshooting methodology and client-communication.

Coding/Math Tutor, TutorDoctor, Littleton, CO — Mar 2021 – Dec 2021

- Designed 11 individualized learning plans for primary and college level students in AP Computer Science and math.
- Developed personalized homework-completing and attention-keeping habits for students.
